
Subject: Q: WIDGET_TABLE does not fill all available space

Hello,

I am using a WIDGET_TABLE to show values of a 3x3 integer matrix. It works but I get an extra frame around the table, like this:

```
-----  
| 1 | 2 | 3 | |  
|-----| |  
| 3 | 3 | 1 | |  
|-----| |  
| 1 | 2 | 2 | |  
|-----| |  
|   |   |   | |  
|-----| |  
-----
```

The relevant portion of the code is:

```
w5= widget_base(w4, /COLUMN, column=1) ; I created a widget base  
wmep=widget_label(w5, uvalue="ptext") ; I add a few things in it
```

```
...
```

```
; finally I create the table
```

```
wtbl=widget_table(w5, ROW_LABELS=['X','Y','Z'], xsize=3,ysize=3, $  
column_labels=['R','G','B'],uvalue="ctable",value=fix(cursvox), $  
format='(I3)',alignment=2)
```

Any ideas how to avoid the extra frame? I either do not want it displayed or I want the table expand to fill it completely. Thanks in advance.

Jan
