There are many ways to do this. One way would be to
download COLORBAR.PRO from my web page. :-)

Cheers,

David

Hi Marco

Go to <http://www.dfanning.com/programs/colorbar.pro> and do a 'save
as'. This program is a very flexible way to put colorbars on display
output (screen or hardcopy) Read its documentation. If you have any
more questions, come back, or email me at work.
