
Subject: On-line documentation for changes between 4.0 and 5.0?

The IDL system I help maintain has just upgraded from 4.0.1 to 5.1.

The on-line documentation seems to summarize only the changes from 5.0 to 5.1 -

I can't find anything in HELP detailing the (much larger) changes introduced

in 5.0. Is there anywhere in the HELP file that lists these changes? Or anywhere

else I should be looking? I'm reasonably familiar with the basic changes myself

but would like to be able to point other users here to an introductory document.

Thanks,

Bruce Macintosh
