I am trying to find an idl Emacs major mode. According to the FAQ, wave-mode.el at ftp.pvi.com is a major mode. But wave-mode.el is not actually at ftp.pvi.com. Archie does not know where wave-mode.el is either. Can anybody tell me where I can find an idl Emacs major mode? Or if you have a copy, can you email it to me?

Thanks,
Mike Smyth

P.S. Whoever is in charge of the FAQ should update the answer to question T08.
