Don't worry. I have no ambitions about writing a book, although I hope some day I can put together a nice web page , something about widgets, because they are a lot of fun and I am trying to slowly introduce their use to my colleagues here. I found one colleague who is quite pleased with her results.

I must confess, my user friendly, well documented and commented sample program wasn't so easy to understand and implementing it in her program was not so simple as I imagined...But in the end, we got it working after 20 minutes or so. And even better, she has used it in other programs as well, without my help.

Give a person a fish, they eat for a day; Teach a person to fish, they eat for a lifetime.

Rose
