Subject: Problems with IDLgrText.
Posted by Imanol Echave on Fri, 11 Sep 1998 07:00:00 GMT

Hi people:

I've created some graphics that use IDLgrText and IDLgrAxis objects. When I
work on Linux I haven't any problem, but with the Windows version sometimes the
text becomes "garbage" (the IDLgrText objects and the IDLgrAxis labels appears
as strange symbols). Has anyone had this problem? What's happening?
