To: IDL Gods,

Does anyone out there have an simple idl routine to convert an array of hex numbers to an equal sized array of the equivlent integer numbers? For example the 4 by 6 array below. I have some huge hex datafiles that I am trying to plot and the only way I have found so far is to brute force the arrays.

```
79 86 A0 A0 A5 AB
AB A3 A3 A6 A1 A6
A3 9F A3 A9 AD AA
A6 A7 A8 AD B7 AF
```

Thanks,

Robert
