
Subject: IDL 5.1.1 online help - text search messed up

Hi,

I've just upgraded from 5.0 to 5.1.1. (hpux 10.2) I've noticed that when I try to use the online help to to a text search - when I click on DISPLAY it takes me to a seemingly random page, as though it were using an old lookup table. The README file in the help directory talks about .fts files but I can't find them anywhere. Has anyone seen this problem, or know what the cause (and hopefully the solution) might be?

Thanks.

Index search works fine, and so does following links inside of help.

-Jonathan
