Howdy,

The FAQ didn't include contact information for the product vendors. Would someone who has it handy -- US and France/Europe would be good -- please send it to me.

Thanks,

Seth

The IDL Mailing List info with some questions and answers about the list is not the IDL-FAQ. The purpose of the IDL mailing list is to work as gateway for messages from and to comp.lang.idl-pvwave for IDL users without news access on Internet, CompuServe and several local BBS's. The IDL FAQ with information about vendors is periodically posted in this group. You can get the newest version through ftp:

ftp jaameri.gsfc.nasa.gov

user: anonymous
password: <email address>

cd /pub/idl
get idl-faq
quit
