: IDL programs?

Hi, Andrew -

I don't think there is a standard category list; I compiled a short
list just yesterday by doing a

```
grep -A1 -i CATEGORY *.pro
```

on a lot of library routines. I got:

```
; Widgets, Graphics, Color, Plotting, Image Display,  
; I/O, HDF, Text,  
; Array Manipulation, Curve Fitting, Statistics,  
; Calibration
```

There were a lot more, but I'm trying to keep the categories broad.
Please let us know if you find a comprehensive list.
