
Subject: HDF Data sets containing strings?

I would very much like to be able to append an array of three character strings to an HDF file using the 'HDF_SD_ADDDATA' command. I have tried to do this without any luck, and can find no documentation to help me with this.

In the end I have had to resort to appending and 3*n dimensional array, i.e. 3 characters * however many dimensions are required.

Does anyone have a solution to this problem, I would be most grateful!

I hope I am making some sense with my explanation of the problem.

Cheers

Richard

P.S. If you want to reply to me please replace the 'hhhh' part in my email address with 'uk', I am told this may help me avoid spam!
