Subject: ENVI ROI public code??
Posted by Guido Lemoine on Mon, 30 Nov 1998 08:00:00 GMT

Dear forum,

We are looking for a (public?) description of the ROI vector format that is
used in ENVI. Pointers to existing IDL code to read it would be very welcome
as well. As part of our ongoing quest to flipflop between the "standard" vector
formats, we're trying to set up a lib of conversion routines. If you know of any
good stuff on other formats (esp. ArcView shape files), don't hesitate to let me
know.

Greetings,
