
Subject: Does IDL 5.2 require Solaris 2.6?

Hey folks,

The docs on the CDROM for IDL 5.2 state that the "supported version" for Sun Microsystems Solaris is 2.6 . Has anyone found this to in fact be the case? Will IDL 5.2 work on Solaris 2.5?

If IDL expects all of their customers to upgrade their systems so they can use their precious software then I will definitely have more to say on this!

Dave
