You can download a program called ASPECT from my web page.
It will calculate the window position coordinates to place
a plot with a specified aspect ratio. For example, to get
a plot with a square (1.0) aspect ratio, you can do this:

```
IDL> Window  
IDL> Plot, data, Position=Aspect(1.0)
```

The ASPECT function is here:

<http://www.dfanning.com/programs/aspect.pro>

Cheers,

David
