Some time ago someone had requested information on the Acr/Nema 2.0 medical image format and possible conversion of data from that format to others. I just recently saw this reference, from the SPM mailing list:

> Our group uses in-house written software of my colleague Erik Nolf. The
> C-program called 'Medcon' (Medical Conversion)
> will allow you to conveniently convert between any of the following file
> formats: Matrix/Ecat 6.4, InterFile 3.3, Acr/Nema 2.0, Analyze,
> Gif87a/Gif89a and VT-DICOM. It has been succesfully compiled under
> various operating systems.
> It is freely available at <http://petexp.rug.ac.be/~nolf/#CONVERSION>
