What about XVAREEDIT ? It deals with nested structures, though
you may need to make it more robust.

Here's a piece of advice, Dyer. Do this on your own time with the PC at home and don't touch the University's computers. Then, when you have it done, call me first before you show it to anyone else. I've got a feeling you are not the only one who wants one of these. :-)

Cheers,

David

Don't know of one, but I think it wouldn't be too hard to throw one together using the

Execute function.
