Hi all

After creating an exclusive CW button group and sensitising it and selecting a button, is there any way (after desensitising and sensitising it again) to create the original configuration of no buttons selected?
Thanks for any help received.

David

David -

When you create the CW button group, use the IDS= keyword to store the list of button ids for the group as LONARR[]. Then later you can restore these buttons to whatever state you like, eg.

```
for i=0, n_elements(bgroup_ids) - 1 do $  
    widget_control, bgroup_ids[i], set_button=0
```

Dave
