Has anyone had luck with doing a TVRD or ZOOM using a TEKTRONIX XP-27 X-terminal? I'm running WAVE on a VAX 6320 (Ultrix) and sending output to the xterminal. Everything seems to work 'cept these two commands. Here's the error message:

Illegal unit size: 8 found in routine: \_normalizeimagebits

This does work using the same Tektronix XP-27 with WAVE running on an SGI .... Any ideas?
