The URLs

<http://www.astro.washington.edu/deutsch/idl/htmlhelp/index.html>
<http://www.astro.washington.edu/deutsch-bin/getpro/library26.html?COORD>

are a bit more convenient I suppose...

I don't think I qualify as old yet, but according to Eric Deutsch's
library search page at

<http://www.astro.washington.edu/deutsch/idl/htmlhelp/index.html>

the only library routine named COORD is the following

[http://www.astro.washington.edu/deutsch-bin/getpro/library26.html ?COORD](http://www.astro.washington.edu/deutsch-bin/getpro/library26.html?COORD)

Cheers,
Liam.
