
Subject: Anyone called NCSA Java HDF server from IDL?

It's a long shot, but I'm wondering if anyone has tried calling the NCSA Java HDF server from IDL, described at

<http://hdf.ncsa.uiuc.edu/java-hdf-html/jhs/index.html>

The basic problem is this: I have large (hundreds of MB) HDF files at a remote site, and I'd like to access them locally. In particular, I need to be able to select 'slices' from a SDS.

Cheers,
Liam.
