I am a very new user of IDL.

I notice many discussions in this group about pv-wave. My question is:

What is pv-wave, and what relationship does it have with IDL?

PV-WAVE is made by Visual Numerics, Inc. Their web site is at  
<<http://www.vni.com/>>, with a PV-WAVE specific section at  
<<http://www.vni.com/products/wave/index.html>>. I have a link to some  
projects done in PV-WAVE at <[http://www.ivsoftware.com/IV\\_SWPVWAVE.html](http://www.ivsoftware.com/IV_SWPVWAVE.html)>. There is also an outdated FAQ at  
<[http://www.ivsoftware.com/PVWAVE\\_FAQ.html](http://www.ivsoftware.com/PVWAVE_FAQ.html)>, which will provide some info  
about PV-WAVE's origins.

Can't help with the bonus question.

IHM is the contraction of Interface Homme-Machine. It's the french  
translation of the english GUI (Graphical User Interface)
