Subject: AVS/IDL or PV-WAVE interface

Some people here at NRL were playing with a beta test version of
an interface from RSI that would allow AVS to call up IDL
When I called RSI, their tech rep said that work on that
interface had been discontinued (and the beta-test version was
unavailable) because AVS was working on a module that would do
about the same thing as IDL/PV-Wave, so RSI didn't want to have
anything to do with AVS. Does anyone have any ideas on how one
could easily interface IDL or PV-Wave (we run both) to AVS?
