Just a quick note to say good bye for a while and to advertise my updated web page <http://www-as.harvard.edu/people/staff/mgs/idl/> which will stick around for a while. I learned a lot (not only about IDL ;-) in the past 2.5 years, and I will be happy to return to this newsgroup once I am settled in Germany.
BTW: I recently discovered that I can run IDL with TrueColor in Linux, I have just never read David F's article carefully enough! Now I really have hell of a lot of work to do to make all my programs "color aware" as David calls it.
But Germans are perfectionists, so it may take a while ;-)

Best of luck to you all, see you in fall,

Martin.
