<pre>Dear all</pre>

<pre>I'm using Cw-Defori for regions of interest in the image ,</pre>

<pre>every time I want to resize -expand- this region before using cw-Defori .</pre>

<pre>I tried to use rebin , congrid or expand, but how can I choose the position [x,y].</pre>

<pre>I remmeber that there is program-example may be- to change window by the mouse</pre>

<pre>in the image and then expand the area which is inside this window but I forgot where is it.</pre>

<pre>Thanks</pre>
